Gives good grip

Traction chains for trucks

FOR DUAL TIRES

OFA LS/SS

Designed for log-hauling trucks and in general for terrains demanding improved lateral grip. The wear chain has unstudded links from 8 or 9 mm square wire, depending on tire size.

OFA LS/LS

Optimized pattern of cross chains ensures that at all times a portion of the chain is between the tires and the terrain. The wear chain has unstudded links from 8 or 9 mm square wire, depending on tire size.

OFA LS/LS+

Ultimate in traction for off road use in forestry and oil patch. Studded links provide maximum grip in all types of terrain and conditions. Available in 8 or 9 mm, with tightening cams or without depending on preference and tire size.

FOR SINGLE TIRES

OFA LS

General purpose chain for both the front tires and the outer tire of dual tires. The wear chain has unstudded links from 8 or 9 mm square wire, depending on tire size.

OFA LS+

General purpose chain for both the front tires and the outer tire of dual tires. Studded for extra grip. The wear chain has twisted, double studded links from 8 or 9 mgoum wire, depending on tire size.

OFA LST+

High quality chain for rugged terrain. Depending on tire size, the double tight wear chain is available in 8 or 9 mm, featuring twisted, double studded links.

OFA SS

General purpose chain particularly recommended for steering tires in front. Give also improved lateral grip when mounted on the outer tire of dual tires. The wear chain has unstudded links from 8 or 9 mm square wire, depending on tire size.

OFA SS+

Rugged terrain high performance chain for both front and rear tires. The wear chain has twisted, double studded links from 8 or 9 mm wire, depending on the tire.
